“Energy Medicine is the next big frontier in medicine” proclaimed Dr. Mehmet Oz on *The Oprah Show* in 2007. Based on the concept that every physical, mental, or behavioral problem has a counterpart in the body’s energy systems which can be addressed at that level, Energy Medicine involves balancing and restoring the body’s natural energies to increase vitality, strengthen mental capacities and optimize health. **Donna Eden**, a pioneer in the field of Energy Medicine, has developed easy-to-learn techniques that are known to promote overall wellness, boost the immune system, and positively affect a wide range of issues. Reducing the effects of stress, enhancing concentration and performance, easing pain, balancing hormone levels, and stabilizing emotions are a partial list of daily challenges that can be addressed with Energy Medicine.

Reconnective Healing® can be a life-changing experience. The Reconnective Healing® spectrum is comprised of the full continuum of energy, light and information. Interaction with these easily perceptible energies is initiated during your session, and they continue their amazing work with you long afterwards. You will be attuned to a more comprehensive and evolutionary healing frequency than ever before.

Originally the meridian lines on our bodies were connected to the grid lines that encircle the planet. These grid lines were designed to connect us to a vastly larger grid, tying us into the entire Universe. Over time we have become disconnected from these lines. **The Reconnection® brings in and activates “new” axiatonal lines** that are part of a timeless network of intelligence, a parallel-dimensional circulatory system that draws the basic energy for the renewal functions of the human body.
